

# Verinet VX9 Load Balancing between 2 datacenters in H10 with BGP and/or Firewall and/or Load Balancer

1) Verinet is also available directly with free traffic to and from Symbion, Scion, ITU and SOHO.

2) Verinet is offering direct access and free 2.048 bit encryption of HD, SAN, VPN and SSL certificates.

Verinet is located directly on the DIX and in most network redundant and directly. Verinet gives the freedom to choose from the biggest providers of fiber, content, satellite and mobile systems.
